PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 4+ years of experience specialising in Node.js ecosystems and modern web frameworks. Skilled at bridging technical execution with business goals by building scalable, cost-efficient applications that deliver measurable value. Highly adaptable, with a proven ability to learn and integrate new technologies, cloud platforms, and AI-assisted development tools. **Open to relocation and onsite opportunities internationally.**

TECHNICAL SKILLS

- Languages & Frameworks:** JavaScript, TypeScript, React, Next.js, Node.js, NestJS, PHP, Laravel
- Frontend:** TailwindCSS, Sass, Bootstrap, HTML5, CSS3
- Backend & Databases:** PostgreSQL, MongoDB, Redis, RabbitMQ, RESTful APIs, Supabase, WebSockets
- Infrastructure & DevOps:** AWS, Docker, CI/CD Pipelines
- Practices:** Domain-Driven Design (DDD), E2E Testing, System Design, Microservices

PROFESSIONAL EXPERIENCE

Community Lead	Nov 2025 — Present
NextWork	Remote, USA
- Spearheaded AWS educational sessions, delivering comprehensive training on cloud deployment strategies, VPC architecture, subnets, routing tables, NACLs, and security groups. - Designed and built end-to-end CI/CD pipelines leveraging AWS CodePipeline, CodeBuild, CodeDeploy, and CodeArtifact, integrated seamlessly with GitHub, automating deployment and reducing manual intervention. - Designed high-performance cloud architectures, leveraging CloudFront and S3 optimisations to serve as global bench-marks for educational content delivery.	
Senior Full Stack Developer (Contract)	Apr 2025 — Oct 2025
Drv	Lebanon
- Refactored the Next.js frontend of OORI, a private markets fintech platform, using Domain-Driven Design principles, improving maintainability and achieving a 25% reduction in page load times. - Implemented advanced SEO architectures, including dynamic sitemaps and semantic metadata, improving search engine crawling efficiency and page indexing. - Integrated PostHog analytics into a Dubai real estate platform, tracking user interactions to provide data-driven insights and improve product decisions. - Architected a secure, scalable document management system on AWS, improving upload efficiency while ensuring strict data privacy for sensitive financial documents.	
Full Stack Developer	Apr 2024 — Jun 2025
Gulf Crypto Bank	Remote, Turkey
- Developed a secure shareholder management platform with OTP authentication for a financial services organization, identifying and resolving a critical vulnerability impacting CEO-level access. - Built features for a digital share marketplace, enabling investors to buy and sell shares through a secure trading workflow. - Contributed to the development of a React Native trading application, delivering mobile experiences for investors to manage their portfolios and transactions. - Optimised the Next.js application serving 2,000+ shareholders, reducing frontend page load times by 30%. - Improved API performance by 80% (600ms to 120ms) by implementing the cache-aside pattern with Redis to offload heavy database operations and restructure inefficient queries.	

Backend Developer

Apr 2023 — Mar 2024

WebLayer

Turkey

- Developed high-performance Laravel APIs supporting 10,000+ daily requests and contributing to 40% user growth.
- Designed modular backend features with clear architectural boundaries, implementing ESLint rules and SonarQube pipelines to improve code quality and reduce technical debt.
- Integrated Algolia search to replace legacy lookup systems, significantly reducing query latency and improving search accuracy.

Web & eCommerce Developer

Feb 2021 — Mar 2022

Marka Press & Codendot

Remote, Turkey / Lebanon

- Developed and customised Magento 2 eCommerce solutions, including the **Zmerly & Co** online platform for a solar energy and smart heating business, improving digital presence and customer purchasing experience.
- Built responsive React/Next.js web solutions tailored to client business requirements, focusing on performance, usability, and maintainability.
- Migrated legacy web applications to Next.js, improving Core Web Vitals, performance scores, and search engine indexing.

Education

Uşak University

Nov 2021 — Jan 2024

Associate Degree in Computer Programming

Turkey

LANGUAGES

- Arabic (Native), English (Professional), Turkish (Fluent), French (Beginner)

Key Projects

ArenaX — AI-Powered Assessment Platform

mind-arena-rho.vercel.app

- Built a competitive skill-validation platform featuring AI-driven MCQ quizzes, real-time challenges, and anti-cheat mechanisms.
- Developed recruiter-focused features including custom assessment arenas, smart candidate search, and recruiter hierarchy management.

Open Source NPM Packages

npmjs.com/~moemensaadeh

Created and published reusable *NPM packages for developers*: NextRay, speech-command-engine, ext-sync, and valid-utils.
